

YOUR DONATIONS IN ACTION EUROPE

EUROPE OVERVIEW

Over the years, communities in Europe have continued to rebound from the effects of past wars, food shortages, and the hollowing out of infrastructure. Islamic Relief USA has worked to support in areas such as house rehabilitations, installing heating in the winter, food, orphans, and livelihood support.

OVER THE YEARS

We were there during the worst of the war when our brothers and sisters needed our help to survive. We stayed by their side through decades on the long road to recovery. Today, we're still there. Through our innovative programs, we are able to provide children in need and vulnerable families with the resources they need to thrive.

CONSTRUCTING THREE HEALTHCARE CENTERS

2,918 PEOPLE SERVED - This project will create three new primary healthcare centers in underserved districts serving over 2,900 people. This will be fundamental in the fight against poverty by improving access to healthcare, medication and most of all, improving the quality of life.

SUSTAINABLE FINANCING FOR ORPHANS IN CHECHNYA

1,100 PEOPLE SERVED - The shariah compliant micro-financing project, specifically for widows and orphans families has made building businesses so much easier. It also removes the threat of loan sharks targeting communities. This project works two-fold: partnering with blossoming entrepreneurs and helping to eliminate food insecurity through the agricultural products they develop at scale.

LUIZA'S LONG ROAD TO HOPE

It's been 22 years since Luiza's husband went missing during the conflict in Chechnya. At that time, her children were just six, four, and one. Luiza did her best, but the extreme difficulties she's faced in trying to make ends meet has taken a major toll on her health and quality of life. Her house was on its last leg, and did not provide a secure shelter against the elements when Islamic Relief met Luiza. Through the support of donors, IR staff got to work rehabilitating her severely-damaged home. "I couldn't believe such a blessing could come to us," said Luiza. "But with Allah's mercy, we now have a heating system installed in our house. There are no words to describe what a great help it is for us! I would like to say 'BarakAllah' to the donors who give their support...and to the Islamic Relief employees who worked on this project.

AGRICULTURE STARTUPS IN BOSNIA AND HERZEGOVINA

400 PEOPLE SERVED - This project provides support to vulnerable families to pursue agricultural businesses. Some 70 greenhouses, 30 food dryers, and business education for more than 400 community members are just some aspects of this amazing program.
