

Dots n' Boxes

With a friend, take turns adding one line between two dots. Whoever completes a 1×1 box, place your initials in the box. The game ends when no more lines can be placed. The winner is the player with the most initialled boxes.

A large grid of dots for the Dots n' Boxes game. The grid consists of 20 columns and 20 rows of dots. A vertical line has been drawn between the 17th and 18th columns, extending from the top row to the 5th row.
